The Adopt-a-River Program is supported by your Seminole County Board of County Commissioners.

Our Program Mission is to develop community networks that encourage active participation in the protection of natural resources in Seminole County by educating residents and businesses with hands-on restoration activities.

Why is Your Help Needed?

Many of Central Florida’s waterways have become polluted with trash and debris. This, along with stormwater runoff, has created a negative impact on our water resources. Removal of trash is one of many ways to help reduce pollution. We can also help conserve urban wildlife habitats with the removal of nuisance plants. This, along with education, will help maintain the balance of our natural areas. For more information about water resources in Seminole County, visit: www.seminole.wateratlas.org or www.seminolecountyfl.gov.

What You Can Do!

Ten Things You Can Do to Help Local Rivers or Streams:
1. Become a Watershed Action Volunteer (WAV).
2. Get to know your local rivers.
3. Become a water quality monitor.
4. Coordinate a cleanup in your area.
5. Learn more about water resources.
6. Protect riverside greenways.
7. Maintain your septic system.
8. Place stormdrain markers in your neighborhood.
9. Conserve water at home.
10. Reduce use of pesticides and fertilizers in your landscape.

A Few of the Local Rivers...

- St. Johns River
- Econlockhatchee River
- Wokiva River
- Little Wokiva River
